What Kintone can do for you

Kintone is a customizable workplace platform that lets you manage your team's data, tasks, and communication in one central place.

• Centralize and organize your work

Kintone's customizable workplace platform lets you track and share your tasks and data for effortless collaboration.

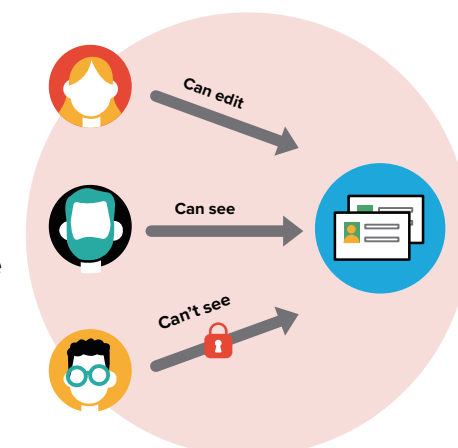

• Use drag-and-drop to create the database apps you want

Kintone lets you build business apps for any work task or process using our intuitive drag-and-drop interface.

• Control who sees what

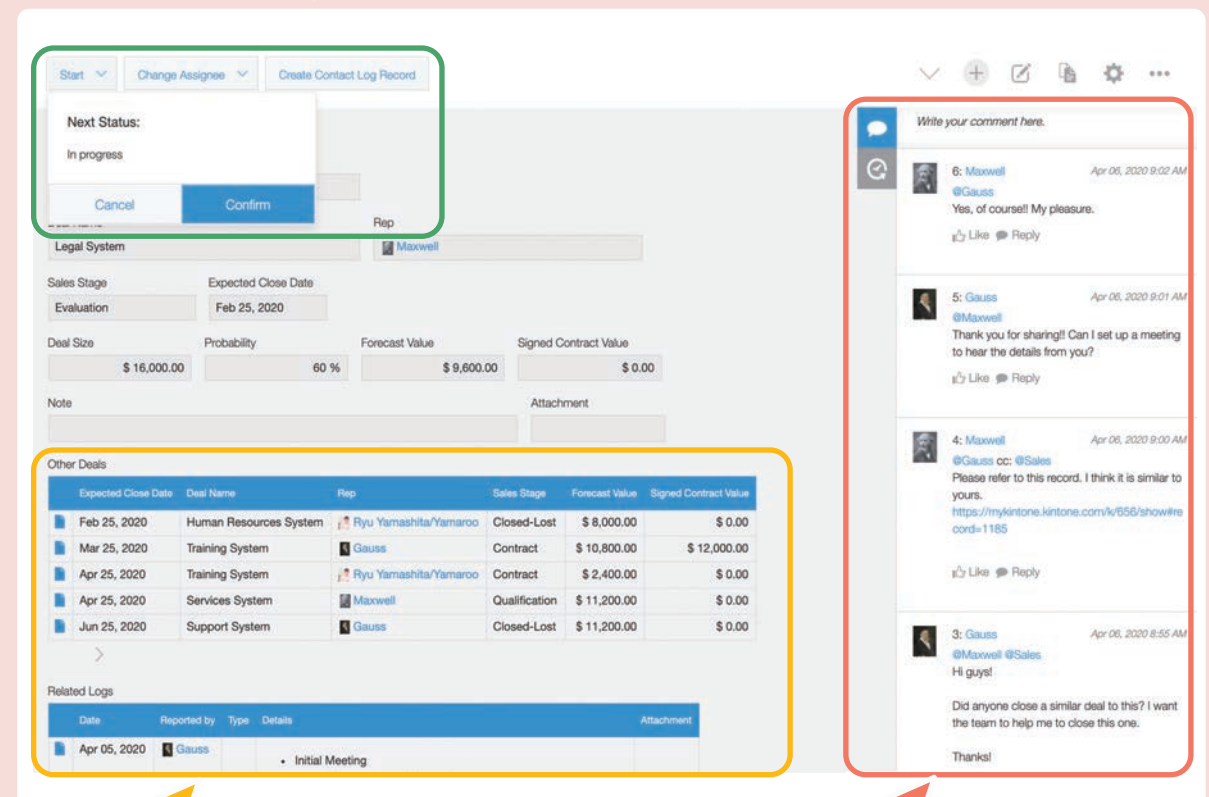

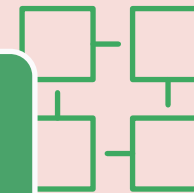

Kintone's granular permissions controls let you choose who sees what—meaning everyone can access the same data records while not always seeing the same thing.

How Kintone works

Kintone brings your data, workflows, and communication together in one place to streamline and optimize your team's operations.

- Work records and results registration
- Resource tracking
- Evaluation management

Common Pain Points Kintone Can Solve

Struggling with Excel Overload

Are you tired of dealing with Excel files that are slow to load or confusing to manage due to multiple versions of the same file?

See p.5

CRM & Sales Lead Management

Do you find yourself slowed down by work duplication and poor project management?

See p.7

Approval Workflows

Do you have to be in the office to approve requests? Are you juggling requests coming in from multiple sources?

See p.9

Project Management

Are different formats and limited visibility into overall progress leaving you overwhelmed?

See p.11

Order Management and Invoicing

Is inefficient communication slowing you down?

See p.13

1 Excel Files That Are Slow to Load or Hard to Manage Due to Difficulty in Identifying the Latest Version

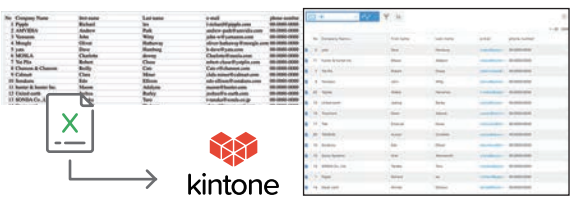

- Too slow to load
- Too many versions
- Key-person dependency

As Excel files grow bigger with more data, so do the delays they cause due to slow loading or difficulties in identifying the latest version. Excel files managed by a few key team members prevent efficient information sharing.

Build a Kintone App Your Team Can Edit, Share, and Manage Together

Upload your Excel files to turn them into apps

Simply upload your Excel files to build Kintone apps tailored to your needs.

Share the latest data in real-time

Centrally managed data in the Cloud gives your team quick access to the latest data and visibility into what needs to be done.

2 Time-Consuming Data Aggregation

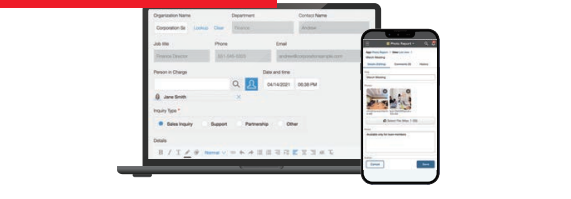

- Various formats
- Time-consuming data aggregation

Using non-standardized Excel files for daily reports and project data makes data collection and calculations time-consuming and cumbersome.

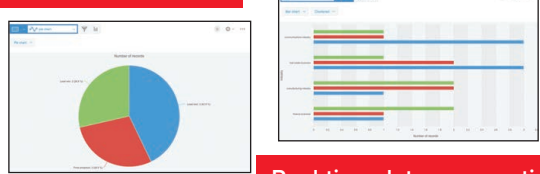

Streamline Data Aggregation with Standardized Formats

Capture and manage data in a standardized format

Whether you are on your PC or smartphone, standardized formats ensure a consistent level of data granularity across devices.

Visualized reports bring clarity to the overall progress

Real-time data aggregation

You can set filter conditions and turn your stored data into graphs. Graphs automatically reflect the latest data, eliminating the need to redo reports or analyses for every data update.

3 Communication Mishaps

- Missed communications
- Miscommunications
- Key-person dependency

Sharing data through Excel files often leads to scattered information across inboxes and chat messages, resulting in missed communications and miscommunications.

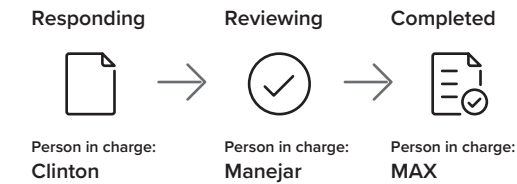

Boost Your Productivity by Keeping All Relevant Information and Communication on Kintone's All-in-One Workplace Platform

Connect data records and conversations

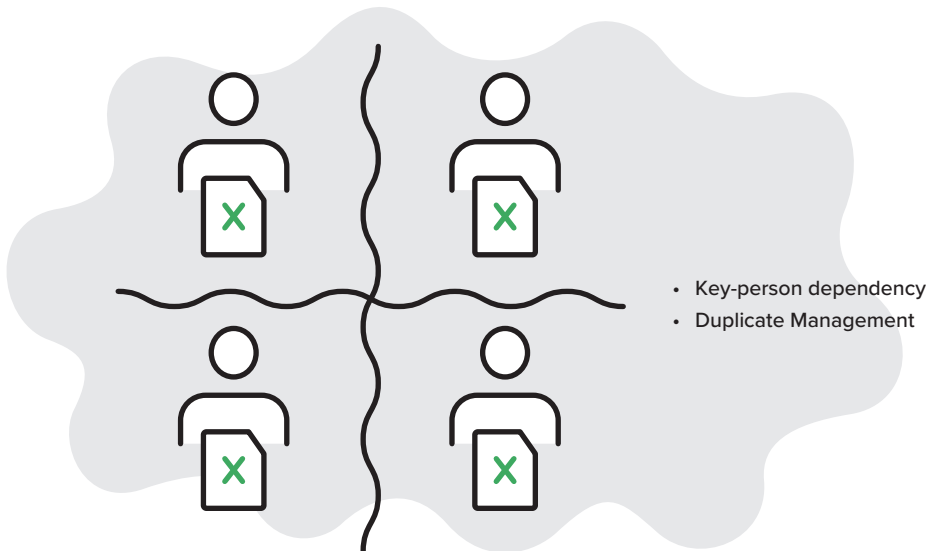

Write your comments alongside the data you're discussing, keeping relevant information in one place.

Connect data records, assigned members, and task statuses

Link tasks with assigned members and statuses to track your specific workflows. This helps visualize your workflows, ensuring that no tasks are forgotten.

1 Key-Person Dependency & Duplicate Management

Managing customer data, leads, and activity logs in Excel files or personal planners hinders real-time information sharing - even with team members nearby - and delays business operations.

Manage Both Data and Relevant Discussions in One Central Workspace, Eliminating Key-Person Dependency and Duplicate Management

Search for everything from data records to the contents of attachments using full-text search

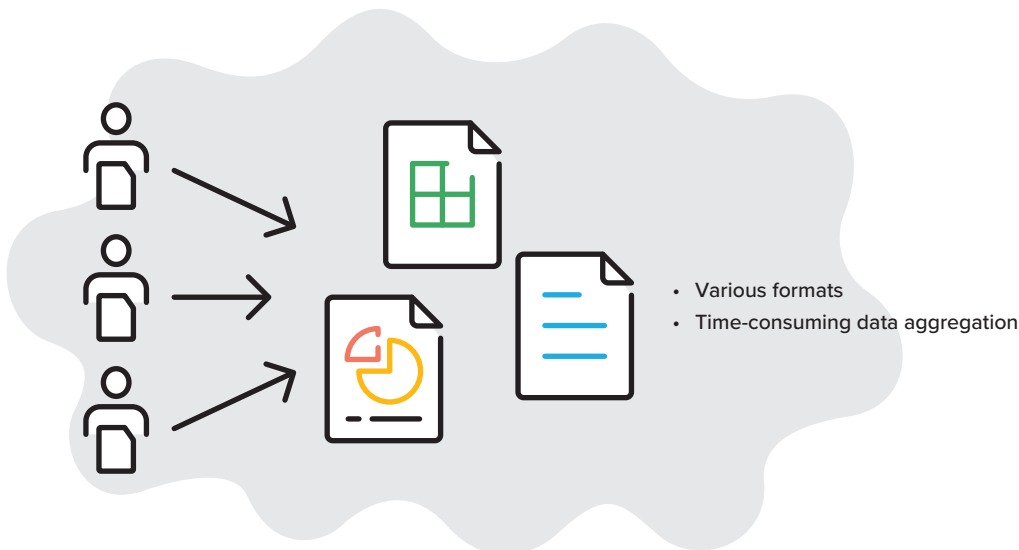

Connect conversations to data records

Edit your data on the records list screen

Data record

Communication

2 Poor Visibility Into the Big Picture

Various formats, slow-loading Excel files, and confusion over the latest version delay the data aggregation process and overall project progress, which can potentially cost you business opportunities.

Get a Big Picture View with Standardized Formats

Track progress with quick reporting

Create graphs using real-time data

Instantly display the data you need by creating a record list or applying filters

Create graphs instantly

Set condition filters to display the record details your team needs

Set filter conditions and turn your data into graphs. Graphs automatically reflect the latest data, eliminating the need to redo reports or analyses for every data update.

You can specify detailed filter conditions to display data records you need in the list. Filter conditions can be saved for quick access the next time you need to view the same records.

1 Work Requests Coming in from Different Sources Risk Being Overlooked or Processed More than Once

- Double handling
- Overlooked requests

Work requests coming in from different channels such as Excel, email, WhatsApp, and phone are prone to being overlooked or processed more than once.

Centralize All of Your Work Requests in One Place and Track Statuses and Assigned Members

Nothing gets overlooked with status updates

Date and time	Status	Inquiry Type	Organization Name	Contact Name
Apr 15, 2021 12:23 PM	Not handled yet	Partnership	Example	Joseph
Apr 14, 2021 6:38 PM	Complete	Sales Inquiry	Corporation Sample	Andrew
Apr 13, 2021 1:08 PM	Not handled yet	Support	Sample B	Tom
Apr 13, 2021 9:30 AM	Complete	Sales Inquiry	Example	Joseph

No more hunting through Excel sheets, emails, and WhatsApp messages. Centralize all work requests on Kintone and easily monitor progress and accountability, ensuring nothing is overlooked.

One-click approvals

Discuss and approve the request on the same page at the click of a button.

2 Managers Cannot Grant Approvals or Search for Past Requests Outside the Office

- Mountain of paper documents
- Not accessible from outside the office
- The approval process stops when the manager is away from the office

Approval workflows involving paper and physical signatures can't move forward when the manager is out of the office. Searching for past requests is time-consuming.

One-Click Approvals, Anytime Quick Search for Previous Requests

Instant approval with one click

Real-time smartphone notifications ensure that urgent requests are addressed. Approve requests with a single click, leaving no request unprocessed, even when you're away on a business trip.

Easy to search for previous requests

You can quickly search for past requests stored in your Kintone app, including the content of attached files.

3 The Current System Does Not Adapt to the Team's Workflows and Is Not User Friendly

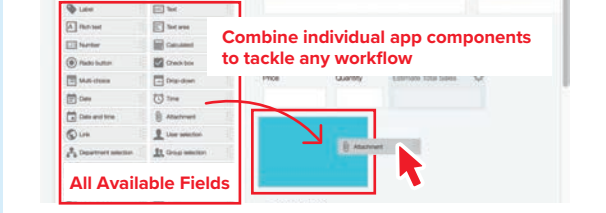

- Not user friendly
- Not customizable

Requests are processed by a non-customizable system that does not adapt to company-specific details and approval workflows. Outsourcing system modifications takes time.

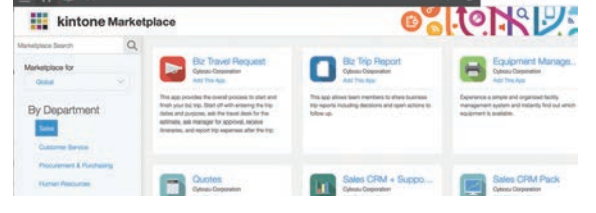

Drag-and-Drop Your Way to Custom Workflows and Stay On Top of Any Work Requests

Drag & drop to build your own apps

Kintone's drag-and-drop interface lets you design an app as intuitively as drawing on paper. You can quickly update an app to reflect the team's feedback, ensuring a stress-free data entry experience for your team.

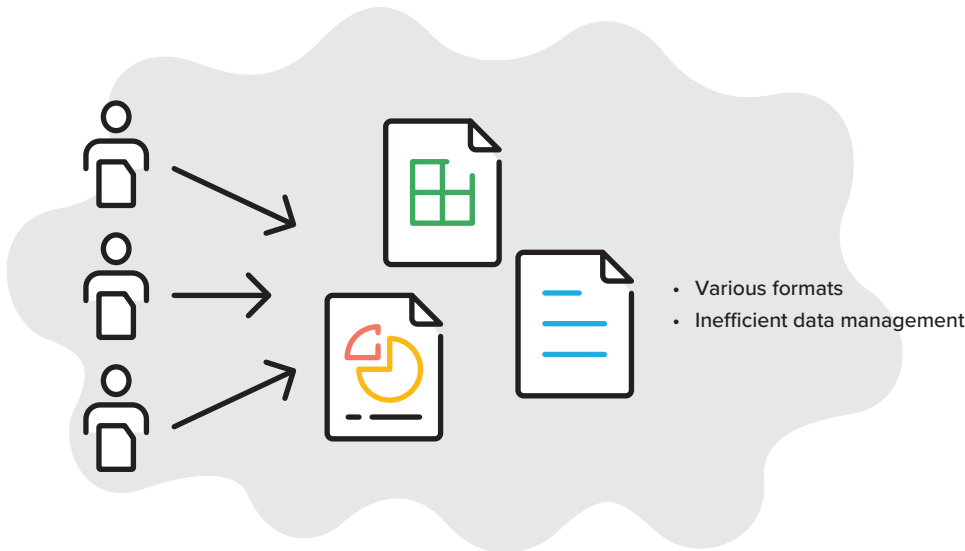

50+ ready-to-use sample apps

50+ ready-to-use sample apps. Kintone offers solutions for all kinds of approval workflows.

1

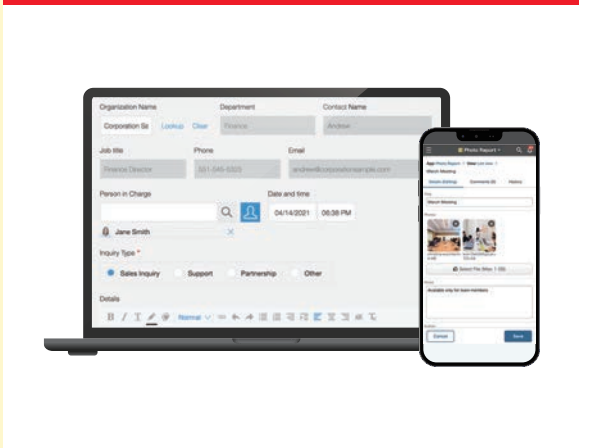

Various Formats Complicate Project Management

Handling projects through multiple Excel sheets complicates project management. Data aggregation also takes too much time and effort.

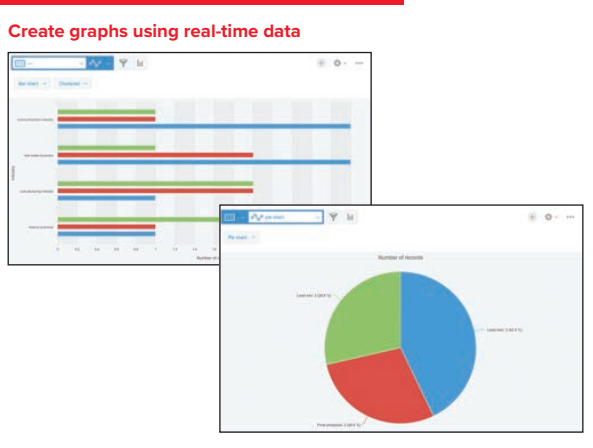

Capture Data in Standardized Formats and Streamline the Data Aggregation and Project Management Process

Capture and manage data in a standardized format

Kintone's standardized format lets you capture and manage your data on both your PC and smartphone without any change in information granularity.

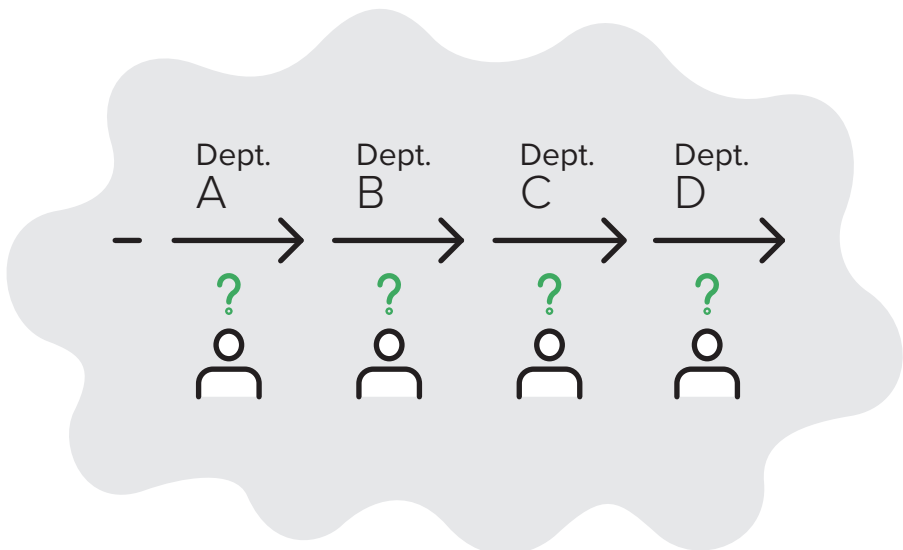

Track progress with quick reporting

Set filter conditions and turn your data into graphs. Graphs automatically reflect the latest data, eliminating the need to redo reports or analyses for every data update.

2

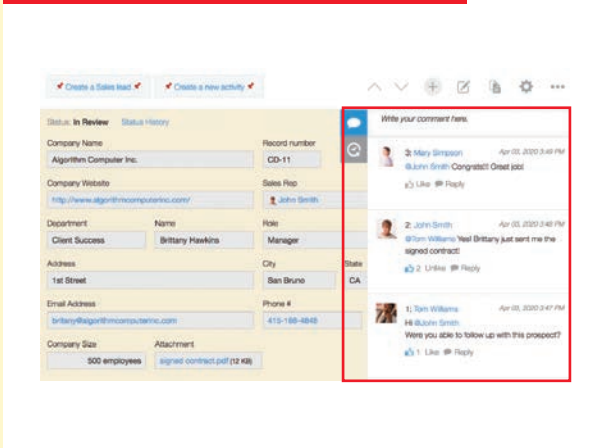

Poor Visibility Into the Project Progress

Progress tracking gets tricky when multiple departments manage different project phases, complicating decision-making and slowing down outcomes.

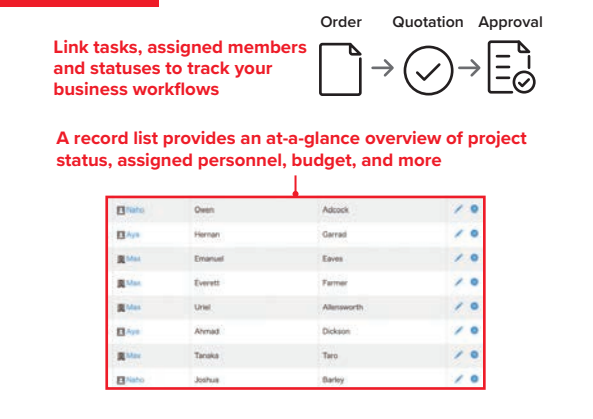

Consolidate Data and Communication in One Place to Effortlessly Track Your Business Operations

Connect data records and conversations

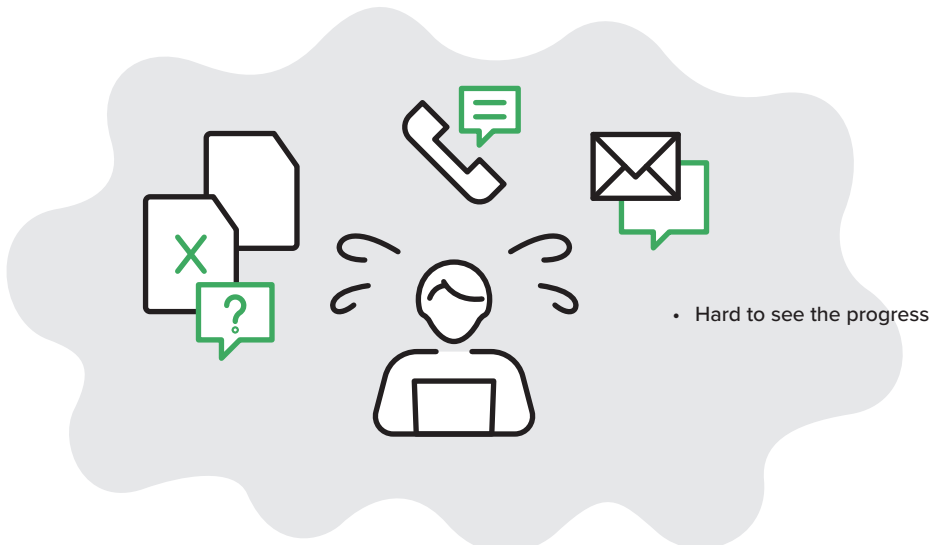

You can add comments, instructions and feedback alongside individual data records, keeping relevant information in one central place.

Connect data records to assigned members and statuses

Visualized project workflows ensure that no tasks are overlooked.

1 Scattered Information Obscures the Overall Progress

Limited visibility into who is working on what may cause unexpected issues.

Capture Data in Standardized Formats and Track Overall Progress and Who Needs to Take Action

Nothing gets overlooked with status updates

Date and time	Status	Inquiry Type	Organization Name	Contact Name
Apr 15, 2021 12:23 PM	Not handled yet	Partnership	Example	Joseph
Apr 14, 2021 6:38 PM	Complete	Sales Inquiry	Corporation Sample	Andrew
