KINTONE FOR MANUFACTURERS

Empower your team to build more together with Kintone's custom database, workflow, and communication platform.

AUTOMATE YOUR PROCESSES WITH KINTONE

Simplify Your Process Management

Move your process management online so you spend less time looking for invisible bottlenecks and more time fixing them. Kintone's automated workflows let you build a transparent workflow map so you can track every part of your production at any time.

Get Real-Time Reports from the Floor

See what's happening to your product and inventory as it occurs, no matter where you are. With Kintone's automated notifications you can get instant alerts when things change so you can solve problems before they snowball.

Generate Regulatory Reports In One Step

Don't waste time duplicating (or deciphering) handwritten field reports for HQ or regulation agencies. Kintone lets you create, upload, and share reports from one central portal so you can spend more time analyzing your reports and less time filing them.

Make Sure Your Standard Operating Procedures (SOPs) are Status Quo

Create a digital papertrail for your SOPs so you can track when they're followed, review when they're not, and fine-tune them when they need an update. Get instant visibility over every part of your workflow with Kintone's database and collaboration tools.

"The best part of Kintone is that you can make it what you want. It's a 'blank check' database that's versatile, smart, and easy to work with. It's a platform anyone of any tech level can use."

Heather Johnson, Compliance Officer, A-B Emblem (Conrad Industries)

Learn why 12,000+ companies and non-profits worldwide, including US and Global Fortune 500, trust Kintone.
