CRM

Kintone's highly customizable CRM is designed to meet all your needs. Keep track of customers, sales, targets and strategies in real time. Supercharge team communication and let your productivity skyrocket.

All your sales at a glance

Instantly visualize all your sales activities and progress using the numerous graphic display functions on Kintone's centralized sales database. Spot opportunities and trends as they unfold in real time.

Take your team's communication to the next level

Share advice, recommendations and alerts with anyone in your team using Kintone's comment and notification functions. Leave important notes about clients and prospects so your team is always up to date. All that valuable know-how will stay safely archived and can easily be retrieved in Kintone.

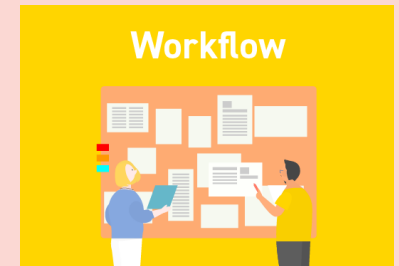

Get the latest info anytime, anywhere

Never miss a sale, thanks to the Kintone mobile app. Access every part of your work from just about anywhere (if you've got an internet connection). Keep in touch with your whole team and unleash your full potential.

By Function

Workflow

With Kintone, customize your workflow to fit your resources and schedule. Track ongoing projects and approve or review requests in real time via PC or our mobile app. Take advantage of instant communication, automatic archives and smart databases to reach peak efficiency.

Stay on top of your projects with a single dashboard

Store and organize your information in a customizable smart database that keeps track of all your progress. Know exactly where you are and what to do next at the click of a button. Share critical information in real time so the ball never stops rolling.

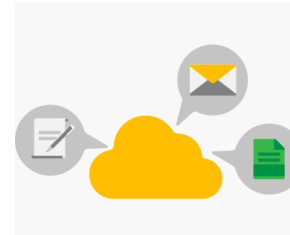

Full access to all your projects on the go

With the Kintone mobile app, access project data and stay in touch with your team anytime, anywhere. Approve, manage and organize your operations wherever you are.

Make sure your whole team knows what's going on

Use the comment function to securely communicate general and project-specific information to key team members.

The all-in-one platform for all your project needs

Access all your information in one place. Bring together budget and expenses, key documents, relevant communication, creative content, and so much more. You'll never waste precious time looking for what you need in Kintone.

By Function

Remote Work

Collaborate with your team from anywhere.

Whether you work from home, the office, or anywhere in between, use a platform that's built for flexibility—and can adapt as quickly as you need when circumstances change. Stay on top of what matters—and stay connected with your team along the way.

Keep everyone in the know

Organize your communication by topic to make sure your entire team has all the latest information they need. Create portals, spaces and threads to break down your work however you want, and automatically archive your conversations when you're done.

Manage information online

Digitally manage access to project data and communication to make sure all relevant stakeholders are up to speed. Notify team members when their help is needed, and share information either broadly throughout the company, or with a select group of people.

Secure access to your work

Access your work securely from wherever you are, on both your computer and smartphone. Rest assured that your company's information is safe, whether you're using the Kintone app or your internet browser.

Find all the information you need

Whether it's the latest project update or archives from years ago, find the information you need in an instant with Kintone's powerful search function. Use full-text search to go through all file-related information and pull out exactly what you're looking for.

By Function

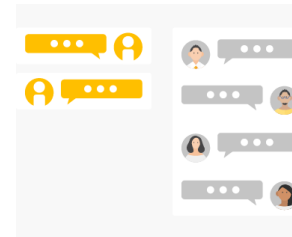

Project Management

Managing projects has become easier and more efficient than ever. Store your data and communication together in smart databases. Track your progress, share files, and automatically archive finished work. Take your projects to the next level with Kintone.

All the info you need at a glance

Know instantly where you stand on each of your projects using Kintone's powerful visualization tools. Whether it's the state of specific tasks or a big-picture overview, you'll easily find the information you're looking for.

Keep your team communication alongside your project data

Your team's important conversations live alongside the data they discuss in organized threads and task records.

Take care of business on the go

Access your work securely from wherever you are, on both your computer and smartphone. Rest assured that your company's information is safe, whether you're using the Kintone app or your internet browser.

By Department

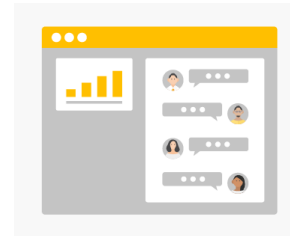

Sales

Use our various visualization options to see all your sales and client data in a couple of clicks. Look up information, communicate, and report back with record speed via the mobile app. The data and communication you need, how and when you need it, with Kintone.

Visualize your progress in real time

Instantly share your most up-to-date strategic information, data and documents with your whole team. Focus on the sale by radically decreasing the time you spend on spreadsheets.

Unite the entire company

Tear down the information silos that waste your precious time. Close more deals thanks to smoother internal communication between all stakeholders, across all departments.

The info you need, at your fingertips

Use the search function to find the exact information you're looking for in just a few clicks.

Stay on top of your work from anywhere

With our convenient mobile app, you can access your Kintone platform on the go. Find and share information with your team whenever and wherever you need.

By Department

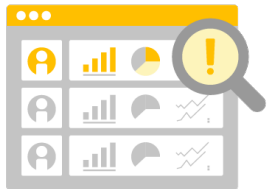

HR & Admin

Whether it's resumes, interview histories, or employee information, protect your sensitive data on a single, secure platform. Manage PTO and payroll while also setting up private channels for smooth communication. Give your team the support they deserve on Kintone.

From paper and spreadsheets to performance and success

Don't let yourself get bogged down in endless paperwork and convoluted spreadsheets. Become many times more efficient by moving all your data and information into secure, easily accessible cloud databases.

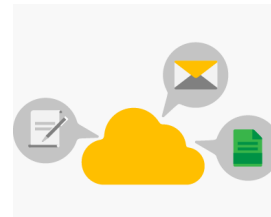

Find your superstars

Use the online database and communication tools to more effectively sort through large numbers of applicants and find the new hire that's right for you. Store, organize and share candidate information to make sure all interviewers are on the same page at all times.

Automate the menial to focus on the meaningful

Reduce back-office costs and improve efficiency by dealing with employee requests and issues through a secure and easy-to-use platform. Automate menial data input tasks to focus your full attention on your team.

All in one platform

Every minute you spend switching from your payroll system to your ERP to paper archives is a waste of time. See for yourself how Kintone can dramatically improve your productivity by arranging and connecting all the information you need to do your best work.

The Basics
